RE: Verizon Wireless Project at Conifer Water Tank site

To Whom It May Concern:

Verizon Wireless is currently working to improve their wireless communication service to the community of Oak Park. I am aware that there are already three (3) wireless carriers in the process of proposing new free standing wireless structures (2 disguised as Elm Trees) at the water tank location, as a result of the water tank being decommissioned within the next year. Verizon Wireless also needs to provide wireless communication service to this community as well, and we are very interested in having a site here, as well.

Can we formally meet with you to discuss how Verizon Wireless can also be included in the current plans to accommodate wireless carriers at this location? Please contact me at (949) 701-1633 so I can discuss this with you in further detail. Thank you for your time, and I look forward to hearing from you soon.

Sincerely,

Ryan K. Young
Program Manager
